

**BUNNY ROOM AM  
CLASS NOTES  
MARCH**

Happy Spring!

The joy and life your children bring into the classroom is great. Maria Montessori writes that as adults we need children for, they bring to us "a fresh energy that we no longer possess. They act differently and say to us each morning rise to another life! Learn to live better. Yes! To live better. To feel the breath of love."

We thank you for sharing your children with us.

We began the month of March exploring our universe. The children enjoyed learning about the big Band and constellations. We had an awesome time with the star dance moving to Star Wars music. We learned that the stars give off heat and light. We learned about our special star (the Sun). In addition, we learned about the planet closest to the sun -Mercury. Each week we will add two planets to our display on the bulletin board.

The children are having a wonderful time with the new planet materials and art project with our unit. This week we will be planning flowers for the arrival of Spring.

Our field trip to the Parkland Planetarium is scheduled for Wednesday, April 3. The bus will leave around 8:30 for a 9:00 show, so please don't be late.
