

Duck April Notes

We are excited to begin the planet study and to go on a field trip to the planetarium in April. We will learn individual planets and make illustrations and crafts to go along with it. We will celebrate Earth day by making a beautiful craft with recycled material and go out around the block to collect trash.

We will do our first gardening project soon, which is the germination of seeds. Once the seeds grow into seedlings, children will get an opportunity to watch their seedling grow and finally take it home.

We also plan on having a butterfly kit in our class. This is a great way of learning about the life cycles.

“The child has a mind able to absorb knowledge. He has the power to teach himself” -Maria Montessori.
