

## KITTY ROOM - AM Class

March 25, 2019

The Kitty Room has been introduced to the Big Bang Theory through storytelling and acting out the formation of stars and planets. This has been a meaningful introduction to the origin of our solar system. The children have learned many facts about each planet in books and put this information to use by imagining what kinds of creatures could survive in the conditions upon each planet and then making a picture and story about the fictional life form. A beautiful model of the sun and planets allows the children to have a hands-on experience with ordering our solar system. Children have the opportunity to make a paper model of the sun, earth and moon to explore the difference between the earth revolving around the sun and rotating around its axis. The culmination of our unit will be a field trip to the Parkland Planetarium on Wednesday, April 3RD. The bus will leave at 8:30AM for a 9:00AM show, so please do not be late! A special thank you to Oliver and Swara! They brought in books from home about space and kindly shared them with everybody!

Sincerely,

Ms. Holland
