

KITTY ROOM - AM Class

April 22, 2019

Our study of the solar system culminated in a wonderful field trip to Parkland College's Staerkel Planetarium. Thank you very much to the parents and grandparents that helped chaperon this trip. The warmer weather of spring has ushered in a season of growing in the Kitty Room. The children are focused on the life cycles of plants, insects and mammals. Our science shelves have been arranged to highlight our beautiful Montessori botany cabinets and parts of plants and animals' puzzles. Planting seeds and watching our own plants sprout and grow is an exciting exercise for the children.

Sincerely,

Ms. Lynn Holland
