

Thanks to parent volunteers for sending snacks and beautiful napkins for Valentine day celebration. Duck room friends are also grateful to families for wish list donations for our class. We appreciate this kind gesture.

Every year we begin the month of March by honoring Dr. Seuss's legacy and his birthday. We participate in 'Read across America' event which is a reading motivational and awareness program. During this time, we read some of Dr. Seuss's famous books and make crafts. Also, this month, we will focus on literacy, including alphabets and phonetic sounds, lines and shapes and will blend them with sensory materials such as sand tray, colors, sensory table, alphabet molds and stencils, magnetic letters, etc.

Colors not only impact learning in children, but also their creativity, productivity, mood and behavior. We will study the color wheel and activities associated with it, such as color mixing and sorting, primary/secondary/tertiary color recognition and coloring in general with various art materials. We hope to have a busy and colorful month.
